

Combo dull

Invisible Sweat stain/Opaqueness

Core-sheath structure

80% Core : PET TiO_2 (15%)

20% Sheath : Semi-dull PET

UV-cut function

15% of the fiber is TiO_2 , which can refract light and achieve the anti-ultraviolet function.

Opaqueness/Invisible Sweat stain!

The fabric contains TiO_2 , which gives the fabric surface a feel of pale scattered light, which in turn reduces the chromatic aberration effect of the fabric caused by the light reflected by moisture.

Suggested Blending Rate: 80%
