

Silk

Silk is a smooth and glossy protein fiber. Tung Ho only chooses the highest grade 1 silk cocoons

- **Superb moisture absorption**

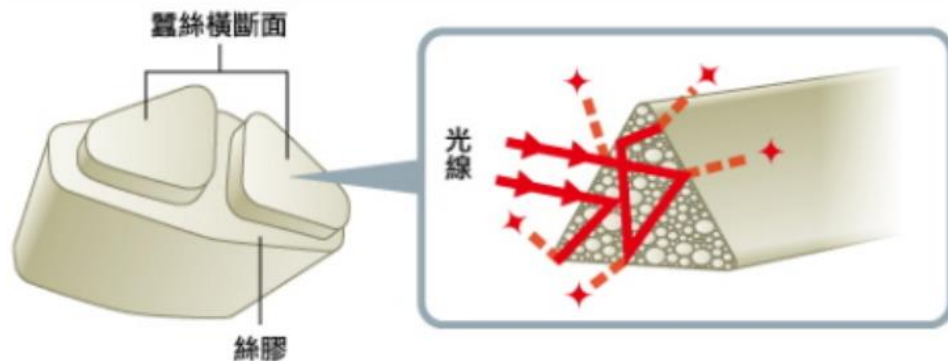

Hydrophilic radical group (hydroxyl, carboxyl, and amino) is able to absorb perspiration and water discharged from the body.

- **Comfortable and skin-friendly**

The protein fiber is composed of 18 amino acids and has excellent biocompatibility. The moisture regain rate is around 11%, and keeps the skin moisturized.

- **Lightweight and soft**

Low density, lightweight, soft texture, and excellent touch.

The triangular molecules in silk act like prisms in the fiber and reflect the light in different directions.
