

Sorona

Sorona is made of refined sugar crops such as industrial corn , 37% of Sorona fiber is made of recycled materials, hence it is less dependent on petroleum. During its production, compared to nylon, it consumes 30% less energy, and produces 63% less greenhouse gas emissions. It is biodegradable and reduces environmental burden.

- ✓ Soft touch , and drapes well
- ✓ Can be dyed at room temperature and room pressure; long-lasting bright colors
- ✓ Fiber strength resistant of Chlorine/UV
- ✓ Stain resistant and easy to clean
- ✓ Eco-friendly, energy saving
- ✓ Recyclable
