

Protection-Insect Repellent Fiber

Natural wood pulp cellulose blended with minerals and Permethrin
8-10% of Permethrin is coated and blended with wood pulp cellulose.
Effectively repels mosquitoes/mites/dust mites/bed bugs/borers and other harmful insects.

- ✓ Proven by German armed forces test TL 8305-0331, the fiber withstands 100+ washes.
- ✓ The fiber withstands UV exposure.
- ✓ Permethrin is gradually released, unlike high strength toxic insect sprays, this fiber does not cause any harm to humans.

Still effective after 50 washes

The repellent property is still effective after 300-hours of exposure to a xenon arc lamp
