

Umorfil Beauty Fiber

- Umorfil is a renewable fiber made of animal protein. Recycled fish scales are extracted and purified through low temperature and made into marine collagen peptide amino acid. This ingredient is then blended with Rayon.

- ✓ Skin-friendly, moisturizing, low irritation
- ✓ Natural fiber, long-lasting skin care
- ✓ UV-cut, anti-static
- ✓ Anti-bacterial, deodorizing

Testing items	Testing results
UV-cut	UPF30 (Good)
Anti-static	Sample Umorfil fiber friction test against cotton V=75 friction-charged electrostatic potential: grade 3 (excellent) Sample Umorfil fiber friction test against wool V=150 friction-charged electrostatic potential: grade 2 (good)
Comfort For Skin	Passed the medical grade test for sensitization/irritation skin (ISO 10993)
Moisture absorption	3 secs (excellent)
Deodorizing	Ammonia 76%/ Acetic acid 99%/ Isovaleric acid ≥99%/ 2-Nonenal >83%
