

Bamboo Fiber

Bamboo fiber is made of sustainable bamboo. Its growing cycle is short and productive. No fertilizers required, it is 100% organic and natural. Bamboo fiber is accredited by OCIA and FSC, and complies with the organic and eco-friendly forestry concepts.

✓ **Green and natural**

Natural bamboo cellulose is processed with renewable technology, and is fully biodegradable in landfills.

✓ **Soft and comfortable**

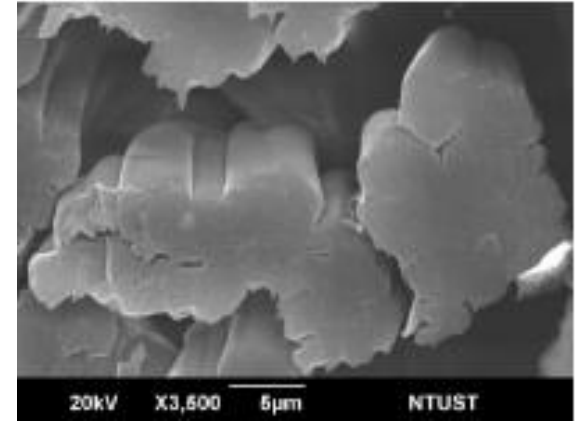

Bright colors, soft touch, brilliant color-fixing and draping effect

✓ **Antibacterial and deodorizing**

Natural antibacterial property, no added chemicals required.

✓ **Moisture absorbent and breathable**

Porous structure in cross-section, moisture is absorbed and discharged swiftly with capillary action.

Porous structure enables swift moisture absorption and discharging.

Dissolve bamboos, extract bamboo cellulose, comb out bamboo fibers
