

# Cupra - cuprammonium

- Cupra comes from **cottonseed coats**, and causes minimal disturbances to the forestry and the ecology. The fiber is processed in ammonia and copper hydroxide, hence the name of 'cuprammonium'.
- Its cross-section is round and smooth, and generates minimal skin friction. Superb comfort, suitable for quality silk and knitted fabrics.
- Suitable for assorted colors with great color-fixing property; excellent fiber choice for eco-friendly fashion wear.

- ✓ Great moisture absorption and releasing properties
- ✓ Cool to the touch
- ✓ Anti-static
- ✓ Draping effect
- ✓ Biodegradable
