

pH Control

PARAMOS

Suggested Blending Rate : 35%

★ pH Control

Mild acidity is the best condition for human skin. PARAMOS maintains our skin soft and gentle by controlling pH value on fabrics for the value to be weakly acidic.

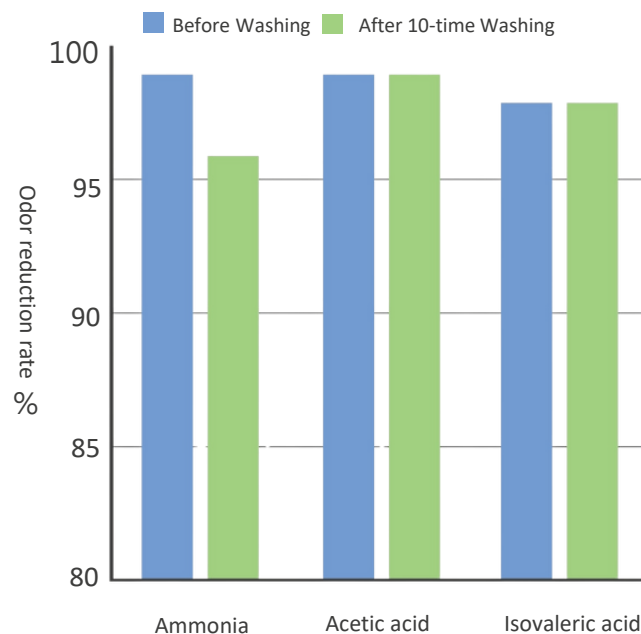

Test Sample : PARAMOS40% / Rayon60%

Test Method : Drop test solution(pH4-pH9) onto a sample and measure pH value.

★ Deodorizing Effect

PARAMOS has a great deodorizing effect against ammonia, acetic and Isovaleric acid.

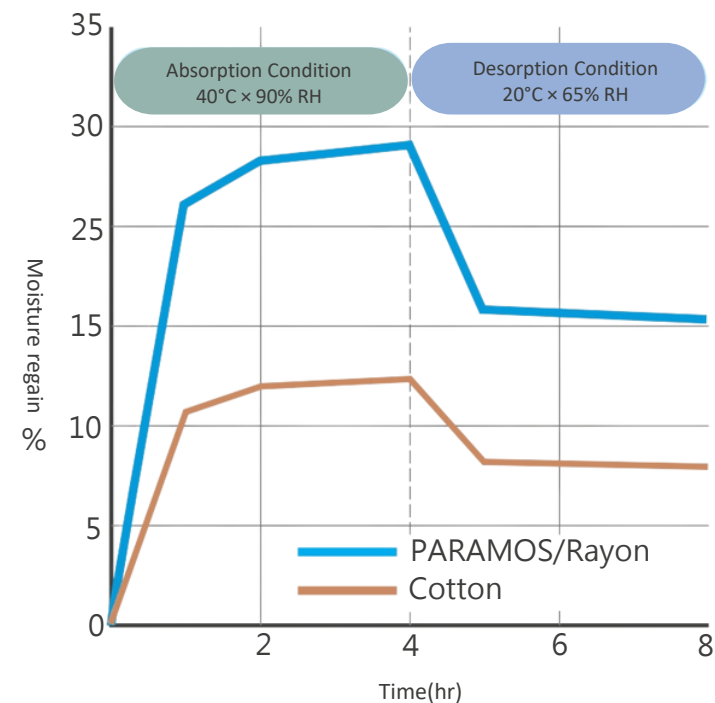

Test Sample : PARAMOS40% / Rayon60%

Test Method : SEK standard(detector tube method and gas chromatography)

★ Moisture Adsorption and Desorption Performance

PARAMOS has a better moisture-related property than cotton.

Test Sample : PARAMOS40% / Rayon60%

Test Method : After the drying process, perform an absorption test at 40°C with 90% relative humidity, followed by a desorption test at 20°C with 65% relative humidity."
