

Naturally derived, cool and fragrant

# Lavender

Lavender combined with Hualien cool jade to create rayon fiber

## ✓ Made with patented technology

The lavender is collected, dried, and ground into powder, and then porous composite powder technology is used to combine it with Taiwan Hualien Cool Jade.

## ✓ Moisture wicking and quick drying

Rayon has good moisture absorption, which helps keep you dry and is suitable for wearing in hot climates.

## ✓ Skin-friendly cooling feeling

Combined with cool jade porous composite technology, the breathability and comfort of the fabric are improved.
